time restriction information for each data segment that specifies the time period, such that the data segment can be reproduced as part of the decoded media stream only if the time period corresponds to the current time and/or date when the media stream is being played back and selectively modifying a part of the encoded media file to embed each data segment and the corresponding time restriction information in combination with other limitations of the claims, was not disclosed by, would not have been obvious over, nor would have been fairly suggested by the prior art of record.

The dependent claims, being further limiting to the independent claims, definite and enabled by the specification are also allowed.
